## Red Listing

Red List Assessment: Vulnerable (VU)

Possibly Extinct

Red List Criteria: D2

Rationale for the Red List Assessment:

Although the species is reported to have declined there are no data to support this conclusion. It is, however, restricted to the main channel of a single river system which is taken as a single location threatened by the potential introduction of alien species, in particular Chondrostoma nasus.

Current Population Trend: Stable

Date of Assessment: 31/10/2004
