

Hemigrammocapoeta kemali

Taxonomic Authority: (Hanko, 1924)

Synonyms:

Region: 1

Common Names:

Order: Cypriniformes

Family: Cyprinidae

Notes on taxonomy:

General Information

Biome Terrestrial Freshwater Marine

Geographic Range of species:

This species is currently known only from Eregili marsh. It used be present in Lake Gölcük near Isparta and Lake Akgöl near Konya.

Habitat and Ecology Information:

A marsh species. The fish is used for mosquito control.

Conservation Measures:

None known to be in place.

Threats:

Habitat loss as a result of the water supply to the marsh being restricted by the construction of a dam across the stream inlet. The marsh has been partly drained and water is extracted from the marsh for agricultural purposes. The marshes are also sometimes burned.

Species population information:

No data available.

Country Distribution

	Native - Presence Confirmed	Native - Presence Possible	Extinct	Reintroduced	Introduced	Vagrant

Utilisation of Species

Purpose/Type of Use	Subsistence	National	International	Other purpose:	
Primary forms removed from the wild	100%	>75%	51-75%	26-50% <25%	Other forms removed from the wild:
Source of specimens in commercial trade	100%	>75%	51-75%	26-50% <25%	Other source of specimens:
Trend in wild offtake/harvest in relation to total wild population numbers over last five years:					Unknown
Trend in offtake/harvest produced through domestication/cultivation over last five years:					Unknown
CITES:					Not listed

Red Listing

Red List Assessment: Critically Endangered (CR) Possibly Extinct

Red List Criteria: B1ab(iii)

Rationale for the Red List Assessment: This species is currently known only from Eregili marsh which has been partly drained and water flow to the area is restricted. In addition, the habitat is threatened by pollution (agricultural, industrial and domestic pollution). The total marsh area is less than 100 km². The species is assessed as Critically Endangered based on restricted range and continuing decline in habitat quality.

Current Population Trend: Decreasing

Date of Assessment: 15/12/2004

Assessor(s): A.J. Crivelli

Evaluator: F. Erk'akan & A. Karataş

Notes on Red listing: Previous Red List assessment: LR/lc (WCMC 1996)
