

Ladigesocypris irideus

Region: 1

Taxonomic Authority: (Ladiges, 1960)

Synonyms:

Ladigesocypris ghigii irideus (Gianferrari, 1927)

Common Names:

Order: Cypriniformes

Family: Cyprinidae

Notes on taxonomy: Some authors consider this species as a subspecies of Ladigesocypris ghigii. Only known from a few specimens collected at one locality

General Information

Biome Terrestrial Freshwater Marine

Geographic Range of species:

This species is restricted to south-west Anatolia in Turkey. Only known in three localities from Bergama (Gediz River system) to Dalaman River.

Habitat and Ecology Information:

No data available.

Conservation Measures:

None known to be in place.

Threats:

None known.

Species population information:

No data available.

Red Listing

Red List Assessment: Data Deficient (DD)

Possibly Extinct

Red List Criteria:

Rationale for the Red List Assessment:

Taxonomy is very uncertain and there are poor data on its distribution and abundance. Known only for certain from three localities. No data on population. Data Deficient.

Current Population Trend: Unknown

Date of Assessment: 16/12/2004

Assessor(s): N. Bogutskaya

Evaluator: A. Karataş & F. Erk'akan
