

Pseudophoxinus callensis

Region: 1

Taxonomic Authority: (Guichenot, 1850)

Synonyms:

Pseudophoxinus chaigoni (Vaillant, 1904)
Pseudophoxinus guichenoti Pellegrin, 1920

Common Names:

Order: Cypriniformes

Family: Cyprinidae

Notes on taxonomy:

General Information

Biome Terrestrial Freshwater Marine

Geographic Range of species:

It is restricted to northern Tunisia (not present in the cap Bon) and to northern Algeria.

Habitat and Ecology Information:

It lives in rivers and lakes. It is small size fish (< 100 mm total length).

Conservation Measures:

None.

Threats:

No data.

Species population information:

No data.

Red Listing

Red List Assessment: Data Deficient (DD)

Possibly Extinct

Red List Criteria:

Rationale for the Red List Assessment: Since the 1980s in Tunisia, and earlier in Algeria, there is no reliable data on abundance, trend and threats on this species. A taxonomic revision of this genus is also needed.

Current Population Trend: Unknown

Date of Assessment: 31/10/2004

Assessor(s): A.J. Crivelli

Evaluator: J. Carmona

Notes on Red listing:
