

Salmo pallaryi

Taxonomic Authority: Pellegrin, 1924

Synonyms:

Region: 1

Common Names:

Order: Salmoniformes

Family: Salmonidae

Notes on taxonomy:

General Information

Biome Terrestrial Freshwater Marine

Geographic Range of species:

It was restricted to Lake (Aguelmam) Sidi Ali, located at 2230 m altitude in the Atlas mountains in northern Morocco.

Habitat and Ecology Information:

No data.

Conservation Measures:

None.

Threats:

Introduction of common carp.

Species population information:

This species disappeared in the late 1930s, probably due to the introduction of common carp. Only two specimens of this species exist in a Museum.

Country Distribution

	Native - Presence Confirmed	Native - Presence Possible	Extinct	Reintroduced	Introduced	Vagrant
Morocco	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Upper Level Habitat Preferences

Score

Lower Level Habitat Preferences

Score

5.5 Wetlands (inland) - Permanent Freshwater Lakes (over 8ha) 1

Major threats

Conservation Measures

Code	Description of threat	Past	Present	Future	Code	Conservation measures	In place	Needed
2	Invasive alien species (directly affecting the species)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	7	None	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Utilisation of Species

Purpose/Type of Use	Subsistence	National	International	Other purpose:	
Primary forms removed from the wild	100%	>75%	51-75%	26-50% <25%	Not used
Source of specimens in commercial trade	100%	>75%	51-75%	26-50% <25%	Other forms removed from the wild:
					Other source of specimens:

Trend in wild offtake/harvest in relation to total wild population numbers over last five years:

Trend in offtake/harvest produced through domestication/cultivation over last five years:

CITES:

Red Listing

Red List Assessment: Extinct (EX) Possibly Extinct

Red List Criteria:

Rationale for the Red List Assessment: This species disappeared in the late 1930s, probably due to the introduction of common carp. Only two specimens of this species exist in a Museum.

Current Population Trend:

Date of Assessment: 31/10/2004

Assessor(s): A.J. Crivelli

Evaluator: A. Azeraoul

Notes on Red listing:
