

Ptyodactylus oudrii

Taxonomic Authority: Lataste, 1880

Synonyms:

Order: Sauria

Notes on taxonomy:

Region: 7

Common Names:

Oudri's Fan-footed Gecko English

Family: Gekkonidae

General Information

Biome Terrestrial Freshwater Marine

Geographic Range of species:

This species ranges from southwestern Morocco to northeastern Algeria in the Anti-Atlas and the Atlas Saharien Mountains, and in the regions to the south of the mountains. It occurs up to 2,600 m asl.

Conservation Measures:

It is not known to exist in any protected areas anywhere in its range.

Species population information:

It is a locally common species, and its populations are believed to be stable.

Habitat and Ecology Information:

It is found on steep, smooth rock faces, and amongst boulders and rocks in semi-desert. The female lays six clutches of one or two eggs per year.

Threats:

There are no known threats to this species

Utilisation of Species

Purpose/Type of Use	Subsistence	National	International	Other purpose:
Primary forms removed from the wild	100% >75%	51-75%	26-50% <25%	Other forms removed from the wild:
Source of specimens in commercial trade	100% >75%	51-75%	26-50% <25%	Other source of specimens:

Trend in wild offtake/harvest in relation to total wild population numbers over last five years:

Trend in offtake/harvest produced through domestication/cultivation over last five years:

CITES:

Red Listing

Red List Assessment: Least Concern (LC) Possibly Extinct

Red List Criteria:

Rationale for the Red List Assessment: Listed as Least Concern in view of its relatively wide distribution, presumed large population, and because it is unlikely to be declining fast enough to qualify for listing in a more threatened category.

Current Population Trend: Stable

Date of Assessment: 12/17/2004

Assessor(s): Wolfgang Böhme, Jose Antonio Mateo Miras, Ulrich Joger, Tahar Slimani, El Hassan El Mouden, Philippe Geniez, M. Saïd Nour

Notes on Red listing:
